

MARVIN CALVO ACUÑA

PROFILE

After finishing high school by maturity, he worked part time at McDonald, at the San Vicente de Paul Hospital as an auxiliary nutrition trainee and at the Pali de San Isidro de Heredia as a cashier. Later I started my studies in Software Engineering, obtaining the Higher Technician in Software Development. My biggest goal is to become a great programmer.

TRAINING

2011 - 2012

Ministry of Public Education

I obtained knowledge in mathematics, biology, social studies, Spanish, basic English, computers and religion. I was awarded the Bachelor's degree in Middle School in the baccalaureate modality by maturity.

2015 - 2018

Cenfotec University

I gained basic knowledge in software development and also in the use of databases. For the knowledge acquired, the university gave me the title of Senior Technician in Software Development.

EXPERIENCE

2016 - 2016

Project 1 of Software Engineering

It was the creation of a web application for the management or control of exercise routines, clients, employees, muscle progress of clients and appointments of a gym. The work groups were chosen by the teachers, where each group had 5 developers and each with their respective role.

2018 - 2018

Project 2 of Software Engineering

It was about the creation of a web application for a bus terminal, where you had to control the number of buses at the end, bus parking, customer parking, card payments on the bus, bus route using google maps where bus and bus stops were marked in real time and complaints from customers that could become a sanction for a bus line were also handled. The work groups were chosen by the teachers, where each group had 5 developers and each with their respective role.
